

Sprint 1 Report

Spotifam
Spotifamers
20 October, 2019

Actions to stop doing

- N/A: Nothing to stop doing
 - 3 meetings per sprint has been going well
 - Good communication via text and Slack
 - Good allocation of tasks among members of the group
 - Especially via Trello

Actions to start doing

- More participation among members in the Slack chat
 - The Slack channel was added fairly late into the sprint, so the low communication on the channel so far is understandable
- Possibly working together in person as the project gets more complex
 - Eventually the project will get to a point where members might work on stuff that is very similar. In these cases, it would be best to work in person. Already the queue and control components could have been useful to work on as a group since they are closely related.
- Start using the Planning Poker method of assigning user story points.
 - In this sprint I feel we underestimated how long stories would take which lead us to have incomplete tasks.

Actions to keep doing

- We should definitely continue having 3 meetings per week directly after class. Being able to apply concepts we hear in class in our meetings is helpful.

Work completed/not completed

- Completed
 - Mockup of Homepage

- Basic React app setup
- Empty Landing Page / Player Page components
- Basic hookup to domain name (netlify)
- Not Completed
 - Controls component
 - User sign into Spotify
 - Design of web player
 - Domain setup
 - Homepage setup
 - Flask Endpoints for Rooms
 - Creating a room
 - Adding to a Queue
 - Getting current queue for a room

Work completion rate

- User Stories Completed
 - As a user, I should be able to access the Web App via domain. Hook up a github repo with a web app framework
 - As a user, I should be able to see some basic visuals that let them see the title, and purpose of the web app, so I can be sure that I am where I want to be
 - As a user, I should be able to see what song/artist/album is playing, so that I know what song/artist/album is playing.
 - As a user, I should see the album cover art displayed on the Web Player so that I have a visual sense of what type of music is playing
- Total Number of Work Hours Completed
 - 35
- Total Number of Days
 - October 9th-October 18th (9 days)
